# Light Refurbishment Loans

Light refurbishments are typically where the total cost of works is less than 20% of the current value and the works do not require planning permission. They usually involve internal works such as redecorations, new kitchens and bathrooms and internal reconfigurations. Structural changes and small extensions under permitted development rights can be considered provided the property is residential at the outset and remains residential after the works are completed.

First and second charge bridging loans assisting borrowers with their everyday short-term funding requirements secured against buy-to-let or investment properties.
